

AthleteBiomech AI - Coach Injury Risk Report

Generated: 2026-06-18 19:03

Athlete Name	Sample Athlete
Sport	Cricket
Combined Risk Level	MEDIUM
Combined Risk Score	42%

Risk Score Summary

Risk Type	Score	Level
Workload Risk	47%	MEDIUM
Movement Risk	35%	LOW
Combined Risk	42%	MEDIUM

Sport-Specific Risky Body Areas

- Shoulder
- Elbow
- Lower Back
- Knee

Workload Risk Reasons

- Moderate-to-high training frequency.
- Moderate match frequency.
- Recovery days are slightly low.

Video Movement Risk Flags

- No major risky posture pattern detected in sampled frames.

Average Joint Angles

Metric	Average Angle
left_elbow_angle	88.4 degrees
right_elbow_angle	82.97 degrees
left_knee_angle	132.51 degrees
right_knee_angle	108.72 degrees
left_shoulder_angle	49.67 degrees

right_shoulder_angle	60.97 degrees
spine_tilt_angle	7.79 degrees

Coach Recommendations

- Maintain balanced workload and recovery.
- Avoid sudden increase in training volume.
- Add proper warm-up and cooldown.
- Track weekly workload and movement changes.
- Focus on technique correction for flagged movement risks.
